SUMMARY

Recent B.E. graduate in Artificial Intelligence & Machine Learning with strong knowledge of Python, SQL, Machine Learning, Data Structures, and Database Management Systems. Experienced in developing machine learning and database-driven applications through academic projects and internships. Quick learner with strong problem-solving and communication skills, seeking an opportunity as a Software Developer at a leading IT organization.

EDUCATION

C Byregowda institute of technology

Kolar, India

Bachelor of Engineering in Artificial Intelligence and Machine Learning: CGPA-7.1/10

2022-2026

Venkatadri Independent PU College

Chintamani-2022

Pre University Course (PUC): Percentage:64.5%

Sri Venu Vidya Samsthe

Srinivaspur-2020

Secondary School Leaving Certificate(SSLC):Percentage-86.08%

SKILLS

- **Programming Languages:** Python, SQL
- **AI/ML:** Machine Learning, Deep Learning, CNN
- **Soft Skills:** Problem Solving, Communication, Teamwork, Time Management
- **Libraries:** Pandas, NumPy, Scikit-Learn, Matplotlib, OpenCV
- **Tools:** Jupyter Notebook, VS Code
- **Operating Systems:** Windows, Ubuntu

PROJECTS

1.Innovation in Stroke Identification: A Machine Learning-Based Diagnostic Model Using Neuroimages

- Developed a CNN-based stroke detection model using Python, TensorFlow, and OpenCV.
- Performed image preprocessing and feature extraction on neuroimaging datasets.
- Achieved accurate classification of stroke images.
- Improved automated diagnostic support for early stroke identification.

2.Crop Recommendation System (Mini Project)

- Built a machine learning model to recommend crops using soil and weather parameters.
- Used features including NPK values, pH, humidity, temperature, and rainfall.
- Improved crop recommendation accuracy and supported smart farming decisions.

3.Student Database Management System (DBMS Mini Project)

- Developed a database-driven application for managing student records, attendance, and academic performance.
- Implemented CRUD (Create, Read, Update, Delete) operations using MySQL and Python.
- Designed an efficient database schema to ensure data integrity and easy record retrieval.
- Enhanced administrative efficiency through automated student information management.

INTERNSHIP

1. Data Science

(Advaith Innovation and Incubation Foundation, Kolar)

Feb - May,2026

Super Store Sales Analysis (Internship Project)

- Performed sales data analysis using Python.
- Cleaned and processed large datasets using Pandas.
- Created visualizations using Matplotlib.
- Generated business insights from regional sales trends.

WORK SHOPS & TRAINING

- Real-World Industrial Insights in Deep Learning and Machine Learning (CBIT) March 2025
- Cyber Security and Ethical Hacking with AI Tools (CBIT) November 2025

CERTIFICATE

- Data Science Internship Certificate
- Deep Learning Workshop Certificate
- Cyber Security and Ethical Hacking with AI Tools Certificate
